

CONIFERS IN CONTAINERS

These plants are supplied in containers except those marked RB, which are rootballed.

It is important to select appropriate plants for the site conditions and to maintain the plants adequately during their first summer.

For larger quantities please ask for a quotation

Cupressus sempervirens

Cupressus Castlewella

Cupressus leylandii

Cedrus atlantica glauca

Larix kaempferi

		Suitable for hedging	Size (cm)	£ each	10+
Araucaria ★					
araucana (Monkey Puzzle Tree)	Distinctive slow growing conifer eventually making large tree. Best suited to moist soils.		60-80	125.00	
Cedrus ★ :★:★:					
atlantica glauca (Blue Atlas Cedar)	Spectacular large specimen tree with blue-silver foliage. All well drained soils suitable but requires plenty of space due to its eventual size!		100-125 175-200	48.00 124.00	
deodara (Deodar Cedar)	Large specimen tree with pendulous branches and blue-green foliage.		125-150 200-250	48.00 150.00	
Cupressocyparis ★ :★:★:					
Castlewella (Golden Cypress)	Golden form of Leylandii. Slightly slower growing and denser branching. Excellent for hedging & screening.	●	60-80 150-175 200-250 300-350	3.95 20.00 54.00 108.00	3.50 18.00
leylandii (Green Leylandii)	Fast growing conifer, ideal for instant screening. Can be used a specimen tree reaching 25m if left unpruned. For hedging it should be trimmed April & August.	●	60-80 150-175 200-250 250-300 300-350 400-450 500-550	3.95 20.00 54.00 82.00 108.00 275.00 550.00	3.50 18.00
Cupressus ★ :★:★:					
macrocarpa Goldcrest (Golden Monterey Cypress)	Fast growing dense conical conifer. Golden yellow feathery foliage, lemon scented. Open sunny position and tolerates coastal conditions.	●	125-150 200-250	32.00 76.00	
sempervirens Pyramidalis (Mediterranean Cypress)	Forms a thin green pencil-shaped column. All well drained soils not too exposed.		125-150 175-200	42.00 64.00	
Larix ★ :★:★:					
kaempferi (Japanese Larch)	Large deciduous conifer with brilliant green spring colour and orange autumn colour.		125-150	25.00	
Metasequoia ★ :★:★:					
glyptostroboides (Dawn Redwood)	Deciduous, strong growing tree, conical when young. Leaves turn pink and gold in the autumn before falling. Good in damp soils.		175-200 250-300	30.00 115.00	
glyptostroboides Goldrush	Golden form of Dawn Redwood, keeping its colour throughout the season. Orange and gold tints in the autumn.		175-200	32.00	
Picea ★ :★:★:					
Picea omorika (Serbian Spruce)	Very hardy spruce suitable for most soils. Older branches droop slightly, curving upwards at the tips.		200-250	100.00	

CONIFERS IN CONTAINERS

		Suitable for hedging	Size (cm)	£ each	10+
Pinus ★ 🌊 ☼					
austriaca (Austrian Pine)	Large tree, excellent windbreak. Good for maritime areas, chalk soils and exposed sites.		150-175 200-250	130.00 145.00	
pinea (Stone/Umbrella Pine)	Distinct medium sized tree developing a characteristic umbrella-shaped head. A picturesque pine particularly suited to sandy soils and maritime areas.		250-300	190.00	
sylvestris (Scots Pine)	Our native pine. Large tree often with orange / reddish young bark. Conical when young, becomes flat topped with age. All free draining soils.		40-60 200-250	4.25 145.00	3.90
wallichiana (Bhutan Pine)	Very attractive species with long and graceful foliage. An elegant, large broad-headed tree retaining its lower branches when isolated.		125-150	98.00	
Sequoiadendron ★ 🌲					
giganteum (Giant Wellingtonia)	An impressive, tall towering dark green tree with deeply furrowed reddish outer bark as it ages. Any soil except shallow chalk.		200-300	170.00	
Taxodium ★ 🌲					
distichum (Swamp Cypress)	A strikingly beautiful tree and the most suitable conifer for wet conditions. A large deciduous tree with reddish/brown bark and green leaves which turn bronze in autumn.		150-175 200-250	32.00 180.00	
Taxus ★ 🌲					
baccata (Common Yew)	One of the finest of all evergreens for hedging or as a specimen. Requires well-drained soil, is shade tolerant and happy on chalk. It is not suitable for planting in poorly drained positions. Do not mulch. Toxic if eaten.	●	40-60 60-80 RB 100-125 RB 175-200	6.00 12.50 24.00 75.00	5.50 11.25 22.00
baccata Fastigiata (Irish Yew)	Has a dense erect habit.		90-100	50.00	
Thuja ★ 🌲					
plicata Atrovirens (Western Red Cedar)	A large fast growing ornamental or hedging/screening tree. It makes a splendid hedge or screen, withstanding clipping well and is tolerant of shade and shallow chalk soils.	●	100-150 150-175 175-200 200-220 250-300	19.00 29.50 34.00 42.00 70.00	

Pinus sylvestris

Taxus fastigiata

Thuja
