

Ground Stabilisation and Netting

Gridlock Ground Reinforcement

This system allows the creation of a permanent load-bearing surface using strong inter-connecting HDPE pavers. Installation is quickly carried out by placing pavers on a bed of sand and soil. The cells of the pavers can then be infilled with soil or gravel. Soil can be seeded to establish a grass sward or alternatively turf can be laid directly onto the product and lightly rolled in. Each dark-green paver is 600 x 450 x 45mm deep, supplied on a pallet. Each pallet has 200 pavers, enough to cover 54 square metres.

PRICE ON APPLICATION.

Turf Reinforcement Mesh

A tough polymer grid for the permanent reinforcement of grass areas used by vehicles and pedestrians. Mesh should be laid on short grass and pinned down and left to allow grass to grow through the mesh. The mesh will become invisible and provide a stable surface for lightweight vehicles and heavy pedestrian use and can be mown as usual. For pinning to ground use metal pins. See page 18.

| Roll size | Mesh Size | Colour | Material | Weight | £ |
|-----------|-------------|--------|----------|--------|--------|
| 2m x 30m | 27mm x 27mm | Green | HDPE | 640gsm | 185.00 |

Shade and Shelter Netting

| Roll size | Shade Factor | Colour | £ |
|-----------------------------------|--------------|--------|-------|
| 1.2m x 50m, 50% tape with eyelets | 50% | Green | 62.00 |
| 1.8m x 50m, 50% tape with eyelets | 50% | Green | 88.00 |

A lightweight, rot-proof and strong net made of knitted polyethylene tape and supplied with built-in eyelets. Offers protection against wind, rain and sunlight.

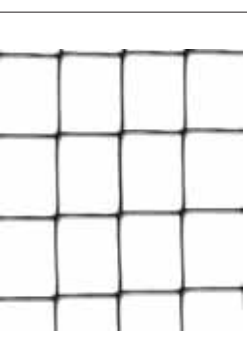

ALSO AVAILABLE IN OTHER SIZES AND SHADE FACTORS - PLEASE ASK FOR DETAILS.

Jute Erosion Control Mesh

| Product | Pack | Each | 5+ |
|-------------------------------------|------------------------------------|------|--------|
| Jute Soil Saver 500g/m ² | Concertina flat packs 1.2 x 70m | £85 | £83.50 |

Jute meshes are the best solution for temporary surface protection and the promotion of re-vegetation. It is completely biodegradable fully decomposing over time. Supplied in cuts 1.20x 70m.

Deer Fencing

| Roll size | Mesh Size | Colour | Weight | £ |
|-------------|-------------|--------|--------|--------|
| 1.8m x 100m | 50mm x 45mm | Black | 80gsm | 123.90 |

This is a lightweight yet high strength mesh structure designed to provide an effective deer control barrier at a cost-effective price. Made in black polypropylene, Deer Fencing is unobtrusive and merges into background, is rot-proof and UV stabilised. Can be quickly erected for immediate protection and with a roll weighing under 15kg, transportation across rough terrain is not a problem.

OTHER MESH PRODUCTS ARE ALSO AVAILABLE - PLEASE ASK.
