

Planting Service

At English Woodlands our expertise lies in the nurture and supply of excellent quality trees and plants that will get established well once they have been correctly planted out on your site or in your garden.

The planting and aftercare of the plants are critical to how well they will grow. To help ensure that your plants get the best possible start, we offer an expert planting service through our trusted contractor whose staff have a wealth of experience in planting trees and shrubs – large and small – and in working with us and our clients across the South East. Our clients can therefore be confident that the plants will be correctly planted and have the best possible chance of success.

Clients using this service benefit from an extended guarantee to replace and replant container grown or rootball plants that fail within 24 months subject only to satisfactory watering of the plants.

If you are interested in using our planting service please ask for a quotation.
