

English Woodlands Plastic Policy

English Woodlands is committed to protecting the environment and to reducing the impact of the plastic we use.

We will do this by:

- Auditing and measuring our current use of plastic.
- Assessing the impact of the plastic we use.
- Making changes, where we can, to use plastics made from recycled materials that can also be recycled themselves.
- Supporting and encouraging our suppliers to adopt the same practices and use recyclable plastics.
- Allowing our customers to return plastics to us for recycling via an approved scheme.

RETURNS POLICY

All pots can be returned to English Woodlands or can be collected from site as long as the plants were purchased from English Woodlands.

The pots will be sent to an approved recycling scheme and recycled.
